

Vegetation Management Department
Request for Chip Dump Site Approval

Property Owner Name: _____

Address: _____

Phone: _____ Email: _____

I am the property owner of the above mentioned site and I would like a load of chips delivered to my property. I give the tree contractor designated by Peninsula Light Company a temporary right-of-entry with the rights of ingress and egress with all necessary personnel, material, and equipment for the purpose of dumping wood chip debris.

Signature: _____ Date: _____

- I would like one load of chips.
- I would like several loads of chips if available.

Driving directions to your property: _____

Location of Dumpsite on property: _____

(please draw a map on back of this sheet if necessary)

In order to manage an efficient program, crews are directed to deliver chips to properties in close proximity to the job site. Because tree work is done on a 3- to 4-year cycle, chips may not be available in your area for some time.

The tree crew foreman has the authority to deem a property suitable for dumping. Steep, narrow, and wet areas may not be suitable for dumping chips. A determination will be made on the status of your dumpsite. If approved, you will be added to the chip list and chips will be delivered at the convenience of the crew foreman.

Mail completed form to:

Peninsula Light Company
